

*solutions you need*

### **WFM300/200 Wafer Flip Module**

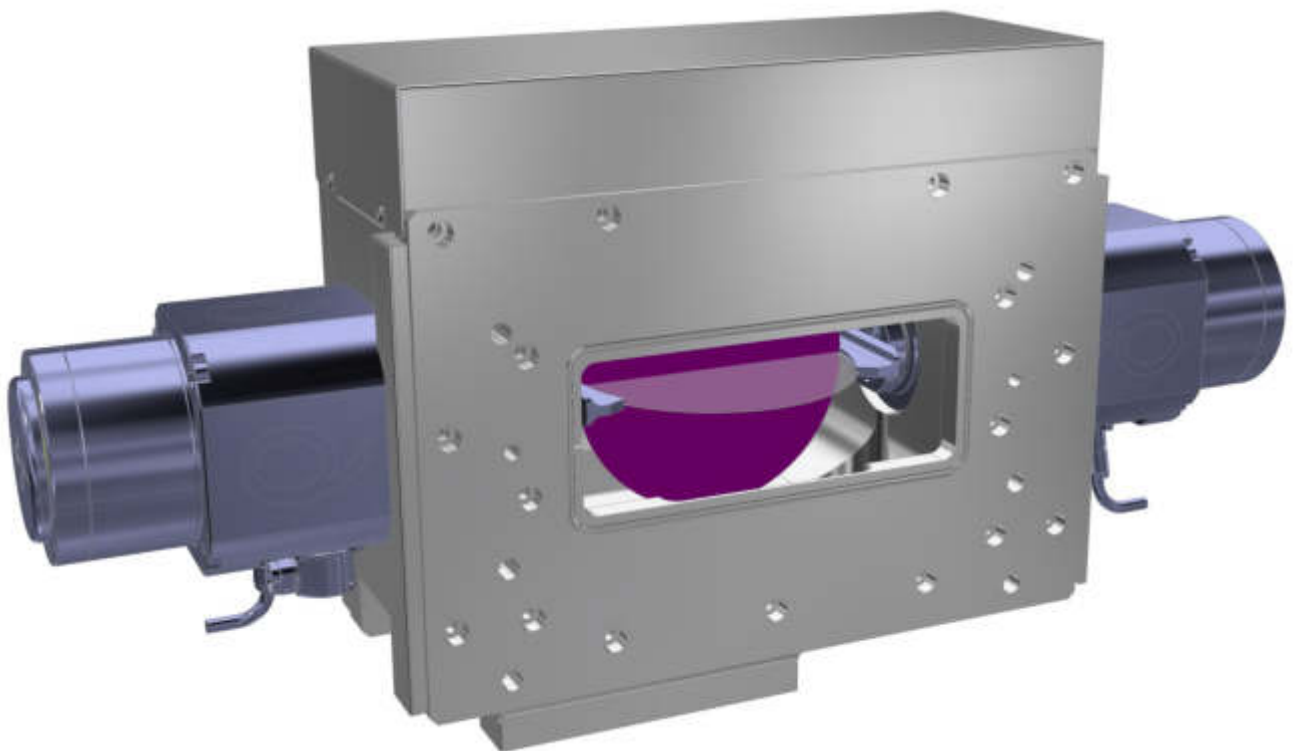

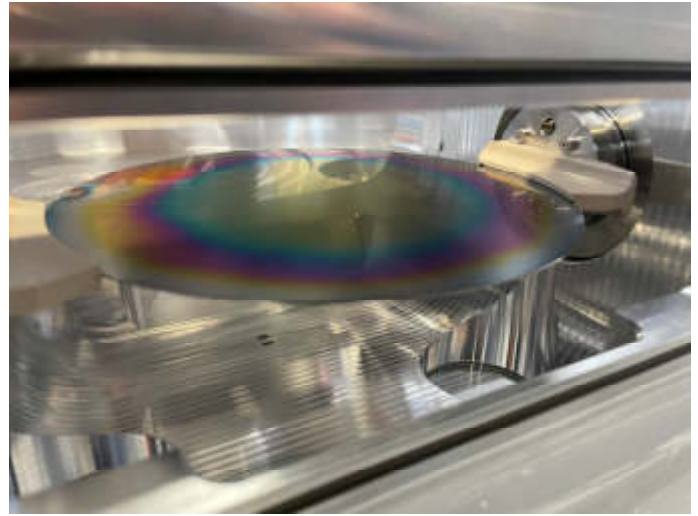

for high vacuum environment  
based on VAC.ROBOTICS robot platform

Mainly consist of:

- substrate flipping chamber
- special edge gripping solution
- precise servo drives
- fluid sealed feedthrus
- control unit: adControl flipping solution
- System will be completely set into operation and pre-adjusted bevor delivery.

Options:

- different substrate sizes and geometry
